SUMMARY

Aspiring technology professional with experience in software development, IT operations, and technical support. Built full-stack applications, developed AI-powered solutions, and supported technical operations across academic and professional environments. Applied problem-solving, analytical thinking, and emerging technologies to deliver practical solutions while collaborating effectively within cross-functional teams.

SKILLS

LANGUAGES

JavaScript TypeScript Python C# MySQL

FRAMEWORKS & LIBRARIES

React Next.js Svelte Tailwind CSS FastAPI

TOOLS & PLATFORMS

Git MySQL AWS Electron DevOps APIs

EXPERIENCE

Desktop Engineer Intern

July 2023 - Nov 2023

Nanyang Technological University

- Configured and deployed laptops and software for staff onboarding.
- Set up workstations and office equipment to support new employee readiness.
- Performed secure data sanitization on retired storage devices in accordance with IT policies.
- Resolved hardware and software issues for end users through on-site technical support.
- Maintained IT assets and assisted with device lifecycle management.

Desktop Engineer Intern

May 2022 - Nov 2022

Indoguna Singapore

- Supported SAP migration by validating, cleansing, and entering business-critical data.
- Ensured data integrity during system transition activities.
- Provided IT Help Desk support by diagnosing and resolving user technical issues.
- Assisted employees with system usage and onboarding to new business processes.
- Collaborated with team members to identify and implement workflow improvements.

PROJECTS

OCBC Virtual Teller Machine

React, Vite, Tailwind CSS, WebRTC

Built a web-based virtual teller machine prototype featuring secure real-time video consultations using WebRTC, providing a digital banking experience that simulates in-branch customer service.

Carbon Emissions Estimator

Electron, FastAPI, Python, MySQL, TypeScript

Built a desktop application that estimates supplier carbon emissions from invoice spending data using USEEIO calculations and NAICS sector mapping.

Personal Portfolio Website

SvelteKit 5, TypeScript, Tailwind CSS, EmailJS

Designed and developed a responsive portfolio website featuring interactive project showcases, animated technology stacks, and a serverless contact system.

Step-PDF

Next.js, TypeScript, Tailwind CSS

Created a web-based document conversion platform that provides PDF and file transformation tools through a streamlined browser experience.

CVify

Next.js, TypeScript, Tailwind CSS, PDF Generation

Developed a client-side resume builder with real-time editing, customizable templates, and instant PDF export functionality.
